Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 23, 28-31 and 33-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harbaugh (US 5,419,424) in view of Weber (US 4,255,652), and further in view of Beck et al (US 5,838,158).
3. Harbaugh discloses feeding the documents in col. 3, lines 3-8, capacitive coupling in col. 5, lines 3-12, deriving a first signal (AOUT 176) and comparing it with reference signal (REF 172) in col. 8, lines 3-66.
4. Harbaugh does not expressly disclose, but Weber discloses the step of converting the signal into a digital signal.
5. At the time of the invention, it would have been obvious to one of ordinary skill in the art to have modified Harbaugh's apparatus for the purpose of improving the efficiency of said document handler.
6. Harbaugh does not expressly disclose, but Beck discloses using phase shift in a measurement circuit for the purpose of compensating for various factors such as air moisture or temperature. See Beck abstract. Note also that Beck discloses determining speed of travel of the document in the form of a web. See last six lines of Beck's abstract.
